

MEW PROJECTS IMPLEMENTED

No	Project Name	Client	Location	Date	Project Description
28	Drain 22 Pumping Station	Ministry of Water Resources	Babel	2007/2008	Construction of a new pumping station near Musaib city . Work included the construction of concrete water intake and concrete base platform according, installation of eight 75kw vertical axial flow SIGMA pumps with 600mm delivery pipes and all related electrical controls and instrumentations
27	MANDLI 1 Pumping Station	Ministry of Water Resources	Diyala	2006/2007	Installation, test, operation and commissioning of five 650 KW, 6.6KV vertical pumps with all related mechanical and electrical equipment.
26	NAHRWAN Potable Water Systems	Ministry of Municipality and Labor	Baghdad	2005	Design , supply and install new water distribution network including water main feeders, laterals and house connections
25	AL-KEFEL new potable Water Distribution System	Ministry of Municipality and Labor	Babil	2005	Design , supply and install new water distribution network including water main feeders, laterals and house connections
24	Rehabilitation of Jissir and Abu Graib sewerage	International Committee of The Red Cross	Baghdad	2004	Work included cleaning and unplugging main sewers, installation of new lifting pumps
23	Supply of utility trucks	Municipality of Romadi	Iraq	2004	Contracts included supply of Sewage Vacuum Truck, 5'000 gallons capacity,

					Septic vacuum trucks 4000 gallons and water tank truck 15000 gallons
22	Manufacturing of kiosk substations	Takaful Co./ Baghdad	Baghdad	2004	Manufacturing and supplying of 28 Nos. of 11/0.4 KV 1000/1600 KVA Kiosk substations
21	Rehabilitation of Madan Water Treatment Plant 5300m ³ /hr	International Committee of The Red Cross	Madan	2003/ 2004	The work included rehabilitation of Chemical equipment, sedimentation tanks, scrapers, sand filters and pumping stations at low lift and high lift
20	Rehabilitation Of Madan Boosting station 24000m ³ /day	International Committee of The Red Cross	Madan	2004	. Work included supply and laying of ductile piping , engaging the boosting station with existing network for the city and rehabilitation of storage tanks
19	Rehabilitation Of Jissir Water Boosting Station 1200m ³ /hr	International Committee of The Red Cross	Baghdad	2003	Work included erecting new pumps, cleaning storage tanks, renovating chlorination system, modifying main 600mm ductile lines.
18	Manufacturing of kiosk substations	TikretUniversity	Tikret	2002 2003	Manufacturing and installing of 23 Nos. of 11/0.4 KVA 630/1000 KVA Kiosk substations
No	Project Name	Client	Location	Date	Project Description
17	Erecting new pumps production line	NAJD Pump manufacturing Establishment	Sult/ Jordan	2002	Work included the design , select equipment , erecting and operating mechanical manufacturing procedures for process pumps production .
16	Construction of DIJLA Group complex	Dijla Group	Baghdad	2002	Work included design and implementation of Hydro utility work for 60 apartment and offices

					building plus emergency power supply system
15	Construction of AL-Bazoon Water treatment Plant 1200m3/day	International Committee of The Red Cross	Missan	2000-2001	A turnkey project, The work included Supply of all materials, construction, erection and commissioning civil constructions, piping, steel structures, water tanks, concrete filters, electrical power supply, pumps erection, installation of chlorination units , pressurized sand filters and connecting to main city lines.
14	Construction Water System for Hilla General hospital	International Committee of The Red Cross	, Babylon	2001	Work included Supply and erect water pumping station, ground concrete tank elevated circular concrete tank plus the design, construction and erection of underground wastewater pumping station .
13	Design and construction of Karama Teaching Hospital Waste Water Systems.	International Committee of The Red Cross	Baghdad	2000-2001	Work included Supply and erect water pumping station, meter Ground concrete tank , elevated pressed steel tank plus design, construction and erection of underground wastewater pumping station .
No	Project Name	Client	Location	Date	Project Description
12	Baji power station	ANSALDO Italy	Baiji Power plant	1999	Location Baiji power station at Baiji 225 km north of Baghdad Subcontract to rehabilitate the local instrumentation for turbine house and boiler for units 5 and unit 6, 220 MW each.

11	Dora power station	University of Technology	Dora - Baghdad	2000	Subcontract to rehabilitate the local instrumentation for turbine house and boiler for units 3,4,5,6, 160 MW each
10	Main power supply for KUT emergency hospital.	Premier Urgence Aid Humanitarian	Kut	2000	Design of main 2000 Amp electrical power boards and emergency power supply and generators
9	Fire fighting system for Assass Transmitters site	Ministry Of Industry.	Abu Graib	1999	Supply and Install the fire fighting system for the fuel tanks including pumps, boosters, piping, control and instrumentation.
8	Design of Fire fighting system for Baghdad Cigarette factory	Ministry Of Industry.	Baghdad	1997	Supply and Install the fire fighting system, water tanks, pumps , boosters , piping ,control and instrumentation.
7	Rehabilitation of Water storage for AL-Kindi hospital	Premier Urgence Aid Humanitarian	Baghdad	1998	Supply and install of two 400 cubic meter pressed steel water tanks with Epoxy treatment
6	Rehabilitation of steam boilers Zahrawi General hospital	Premeir Urgence Aid Humanitarian	Mousel	1998	Complete renovation of main two 5 Ton, 10 bar steam boilers including all utility equipment, softeners, pr-heating tanks and electrical control boards
No	Project Name	Client	Location	Date	Project Description
5	Rehabilitation 28 Nissan complex water system	United Nations (UNHCS)	Baghdad	2000	Supply and erecting new pumps, design of new automatic control panels and renovation and recalibrating for

					pressurized boosting systems.
4	Electromechanical rehabilitation work for ALKINDI general Hospital	Ministry Of Health	Baghdad	1999-2000.	Implementation of new main electrical supply network. Erection of heat exchangers with sensors and controls Supply and erection of new internal telephone communication network.
3	Design and Implementation of Pressurized Water Boosting Systems for KINDI General Hospital	Premier Urgance Aid Humanitarian	Baghdad	1997-1998	Supply erecting and commissioning for two pressurized water boosting systems after a full study for main water city sources, available water storage capacity, Hospital water demand and emergency electrical power supply to maintain water supply in all working conditions.
2	Design and operate a hydraulic test station	AL-Shams Co.	Baghdad	1995	Complete test bench for process pumps hydraulic performance test and calibration in accordance to BS standards and engineering codes meeting best operation point for customers process application.
1	Design and manufacturing of low speed mixers for Tikret Water Treatment plant	Ministry Of Industry	Tikret	1993	Manufacture and erect main low speed mixers 2000mm diameter, 40 kw for sedimentation tanks of Plant
